

Flood Show Report

Both dock and detention centre pumps failed at pre show checks. Dock fixed, show ran without detention centre rain. Fixed in morning (cabling issue, snagged on basin floor detritus)

Hymn verse 2 & 3 cut from Gate going up scene.

Gate pyro didn't fire. Pyro fault. 2nd fault. Complete system overhaul in morning.

Wilderness fires were better and burnt brighter: new laying system.

Lines for stage left side became tangled in the reset: boat operator resolved.
