

Pink line shows the orientation of the full page, you can see we are losing the woman on the right, can Katy ensure her images are orientated to this shape, I need 3mm on all edges of the illustration for bleed.

Pink line in actual page edge.

Advise keeping 10mm of illustration more background than key info to allow for the bind and pull on the pages.

Blue shaded area is the bleed area I require if images are full bleed images.
