All signs will be manufactured in accordance to Chapter Eight (2009) Second Edition guidelines. They will be manufactured in either aluminium, Dibond or Zintec plate, class II reflectivity, or class I where stipulated. Vinyl will be black on yellow, with a minimum x-height of 75mm.

Signs will be erected in accordance with the New Roads and Street Works Act 1991. Suitably qualified operatives will place out the signs on the dates stipulated. Wherever possible, signs will be pole-mounted; otherwise they will be free-standing in angle-iron frame or quick fit frame. Sandbags will be used where appropriate to prevent any sign movement. Regular checks will also be conducted on all signs both leading up to and during the event. Signs will be checked every 24 hours in the lead up to the event and then at regular intervals during the operational show times

All signs will be removed or collected within 48 hours of the end of the event. The signing contractor will, where necessary, make good any damage caused to any street furniture through the erection of their signs.
